

Soft Circuits: Crafting e-Fashion with DIY Electronics BOK-13089

Description: Soft Circuits introduces students to the world of wearable technology. Using Modkit, an accessible DIY electronics toolkit, students learn to create e-textile cuffs, “electrici-tee” shirts, and solar-powered backpacks. Students also learn the importance of one component to the whole – how, for example, changing the structure of LED connections immediately affects the number of LEDs that light up.

This book provides great activities to help people make new and exciting e-textile and wearables projects while still being able to build a strong understanding of electronics basics.

Info:

- Author: Kylie Peppler, Melissa Gresalfi, Katie Salen Tekinbas, & Rafi Santo
- Publisher: MIT Press
- Hardback: 392 pages
- ISBN-10: 0-2620-2783-6
- ISBN-13: 978-0-2620-2784-7
